DETAILED ACTION

The receipt is acknowledged of applicants ' preliminary amendment, filed 12/16/2004.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 41, 47-50, drawn to method of decreasing drowsiness of an individual using towelette impregnated with liquid stimulating organic substance, classified in class 424, subclass 402.
 - II. Claims 42, 44-46, drawn to method for decreasing drowsiness of an individual using towelette impregnated with ammonia containing substance, product thereof and method of manufacturing the product, classified in class 424, subclass 402.
 - III. Claim 43, drawn to method for decreasing drowsiness of an individual using towelette impregnated with ammonia containing substance and liquid stimulating organic substance, classified in class 424, subclass 402.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are disclosed as capable of use separately and the method of Group I does not require any of ammonia containing substance of Groups II or the specific liquid stimulating organic agents of III, and it can use any other stimulating agent such as perfumes. Invention II requires ammonia containing substance only; and invention III requires both ammonia containing substance and liquid stimulating organic substance.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
